Question #13 • Text Response • 9 responses (75%)

Please write a few comments about the texts used in your class. Here are some items you might discuss:

- Explain the scores you gave for particular texts in questions 12.
- What did you find most or least useful about them?
- Suggest section-specific texts that you think should be removed from or added to the class.

Results:

- We were given chapters from the Oxford Handbook of Animal Ethics, where we selected a chapter and were grouped based off of it. I found that branching off of the sources used to understand the main debate around my topic (animal experimentation) was the very useful
- The required texts were very helpful for background knowledge on our topic, and I even cited them in my final works cited. They were great at providing historical context, background information, and helpful for further more specialized research.
- The Perusall readings were a little bit tedious. I did not find it very helpful to read through those papers. I think it might have been better to do more required annotations for sample context/advocacy project papers.
- I thought the texts were, for the most part, relevant to the work we did in class. For instance, the texts related to animal consciousness made me realize that animals are not all that different to humans.
- I thought that reading the AGWR was extremely helpful in succeeding in this class. Learning about how I should start my research and writing process was extremely helpful and helped me grow as a writer.
- The professor was very passionate about his work and he was always available to help us when brainstorming our topic and writing the CP and AP.
- I gave question 12 a score of 6 because the texts we read helped explain some of the expectations for each part of the writing process.
- The professor was very good and was very good on topics and assignments that we did in class and it really helped with our drafts.
- i used the oxford study book for all my basis of essays
