B. Please answer:

Question #10 • Text Response • 15 responses (83%)
What are the TA's strengths?

Results:

- TA has a lot of information and is very clear with grading and responding to comments. TA also allows for made up work if you accidentally did the wrong assignment, have a reason to be late, etc. TA is very obviously passionate about the material.
- Patient and supportive of all the students' ideas; provides patient explanations and makes the experience engaging by sharing diverse perspectives and approaches.
- With it being summer and we only had 5 weeks to cover what we need to learn, Mr. Cao did his best at making sure he broke down each week's material.
- The instructor explains concepts clearly and presents the material in a logical, well-organized way.
- They are very helpful and understanding for mistakes or issues with assignments.
- very clear and knowledgeable about the topics discussed in the course work.
- Great understanding for the material and availability for the students
- The Ta's strengths are being able to help students with any questions.
- Addressing student questions in the limited discussion time provided.
- He is very good at answering all questions that students have
- Very responsive and attentive, very clear with announcements.
- clear logic and interesting, also really easy going! cool guy
- The TA really seems to care about student's well-being.
- Explaining course material in a different manner

Question #11 • Text Response • 14 responses (78%)
How can this TA improve?

Results:

- Since our assignments that were worth a lot of points were writing assignments, I think it would've been best to focus the discussions on how to do each writing component or at least provide examples that way the students would've had a guide to follow.
- Since it is a Summer Session, we had to skip over some materials from the lecture, so I would just say Pacing in what is discussed to try and handle all topics, but otherwise I understand time is limited.
- TA can maybe make discussion sections more interesting instead of simply reading off slides, but that could just be the nature of a philosophy class like this.
- perhaps allowing students to complete assignments in more format options such as video or podcast
- The instructor could improve by providing more examples and clearer feedback on assignments.
- probably be more organized toward the discussion but he is pretty organized already
- You could be a bit more "radical", which brings more idea clashes.
- More office hours and more diverse times would be nice.
- prepare for how fast this summer session is
- idk, he is perfect
